

Natural Range

Natural elements encourage and excite children to participate in open-ended interactions, learn about risk-taking and develop their awareness and appreciation of the environment. Cicada has specially developed products within four natural categories to allow children to explore, discuss and discover the natural outdoor environment. The four areas presented over the following pages are: Botanicals, Natural Wood, Seashells and Pebbles which also include a range of Gemstones. All products are sold in individual packs, and Large Treasure Basket Selections.

All Products are sustainably farmed. Adult supervision required. Not a toy.
